
Overview

Mission: To continuously improve the health of the people of our region.

Letter from Dr. Okun:

The staff at North Mississippi Medical Center Laboratory welcomes the opportunity to serve and assist you in your laboratory needs. Our mission is to maintain a close and continuous working relationship with you to achieve the goal of improving health care for the people of our region.

The wide array of laboratory tests that we offer in-house, together with our partnership with Quest Diagnostics for more esoteric tests, enables us to offer a complete laboratory service which should meet all of your needs in caring for your patients. We realize the important role the laboratory plays in the care of your patients, and we take our responsibility very seriously. In addition to our goal of providing you with the highest quality laboratory tests, we are also constantly alert to the development of new laboratory tests of increased diagnostic accuracy, decreased cost, and improved overall utility. In this rapidly changing environment, it is essential that we offer the most up-to-date and cost-effective laboratory tests so that our patients can be assured of receiving the best health care available.

Sincerely,

Sherry Okun, M.D.
Medical Director
